WAS PROJECT PRESENTED TO THE LOCAL HPC? YES _____ NO X

HAS PROJECT BEEN SUBMITTED IN PREVIOUS YEARS? NO IF SO WAS IT FUNDED?

NEED STATEMENT/PROBLEM ANALYSIS:

A new water source is needed due to the loss of a private well as a result of a land exchange. The well is needed to supply water to an existing system that is in place. The springs located in the area are not reliable due to extended drought, making this permanent water important for local wildlife in the area.

PROJECT OBJECTIVES:

Provide a yearlong water source for three existing troughs and establish a permanent, fenced wildlife water and wetland at the well site to benefit all wildlife in the area.

PROJECT STRATEGIES:

Drill a new well on site, install a submersible pump to be powered by an existing electrical power source located on the adjacent private property (less than 1/8mi.). Create a wildlife water/wetland habitat at the site to benefit wildlife species in the immediate area by placing a large 1,600 gallon water trough in the ground, with overflow pipe to created sealed pond, and fencing the area to exclude livestock. (see diagram)

PROJECT LOCATION: Center of Section 17, T. 18S., R. 24E. The project is located along the east side of the Dagoon Mountains, 1/8 mile south of Middlemarch road.

LAND OWNERSHIP AT PROJECT SITE (Please state specifically if PRIVATE PROPERTY and provide landowner's name): USFS, Coronado National Forest, Douglas Ranger District.

IF PRIVATE PROPERTY, IS THERE A STEWARDSHIP AGREEMENT BETWEEN THE LANDOWNER AND THE DEPARTMENT? N/A
